ACTIVATED CARBON 10lt. Clumping Cat Litter (Fine -grained)

Although Sodium Bentonite alone offer excellent odour binding properties, the combination of Activated Carbon and Sodium Bentonite works like a miracle when it comes complete odour binding. Activated carbon is made of coconut shells a completely natural, highly porous form of carbon works together with Bentonite for odour binding. The large inner surface of Activated Carbon with its special pores traps bad smells such as ammonia and cat feces. It's ideal for homes with male cats, senior cats or multi cats.

- Bentonite
- High Clumping quality
- Dust-free and high odor control
- Extra strong in preventing bad odors that may occur thanks to its active carbon formula
- Fine-grained cat litter
